---

Hi Davis and Sean,

I'm aboard the Cayuse today to oversee surface sediment grab sampling in the upriver reach. AECOM led the health and safety meeting and all crew are wearing the required PPE.

We are at RM 28, very near the Willamette Park boat dock in West Linn. They just collected the first grab at SG-B487 with 29 cm recovery and 40% fines.

There are apparently just 3 surface grab sampling locations left in the upriver reach and to complete the whole surface sampling program (except 2 at Simplot that they are unable to access). They are hoping to collect the 3 upriver today.

Some pics attached.

Thanks,  
Jennifer
